***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 30-46, 48-50, drawn to reconfiguring of a video content, classified in class 463, subclass 30.
- III. Claims 21-29, 47, drawn to downloading game content from network, classified in class 463, subclass 42.
- II. Claims 51-55, drawn to the method of verifying game file, classified in class 463, subclass 29.
- IV. Claim 56, drawn to client-server communication, classified in class 709, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because each claimed process does not require the particulars of the other claimed processes. The invention of Groups I, II, III and IV are related as combinations and subcombinations. Inventions in this relationship are distinct if it can be shown the (1) combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations have utility by themselves or in other combinations, see MPEP 806.05

Art Unit: 3713

©. The combination as claimed does not require the particulars of the subcombinations as claimed because the reconfiguration process of Group I does not require the downloadable process *as claimed* in Group II to carry out its process. The subcombinations of Group II have separate utility such as downloading files from any type of network. Group III is directed to game file verification, likewise, Groups I or II do not need the particulars of Group III *as claimed* to carry out their process. The subcombinations of Group III have separate utility such as ensuring file security in any type of system. The subcombinations of Group IV have separate utility such as organizing and interrelating data.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The Applicants are advised that the reply to this requirement to be complete must include an election of the invention (Group I, II, III or IV) to be examined even though the requirement be traversed, see 37 CFR 1.143.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in

Art Unit: 3713

the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17(i).

A ONE MONTH (not less than 30 days) shortened statutory period is set for replay to this written restriction requirement. The time period is set for reply to this written restriction requirement. The time period may be extended under the provisions of 37 CFR 1.136(a).
